Investment Objective

The RiverPark Focused Value Fund ("RiverPark Value" or the "Fund") seeks long-term capital appreciation.

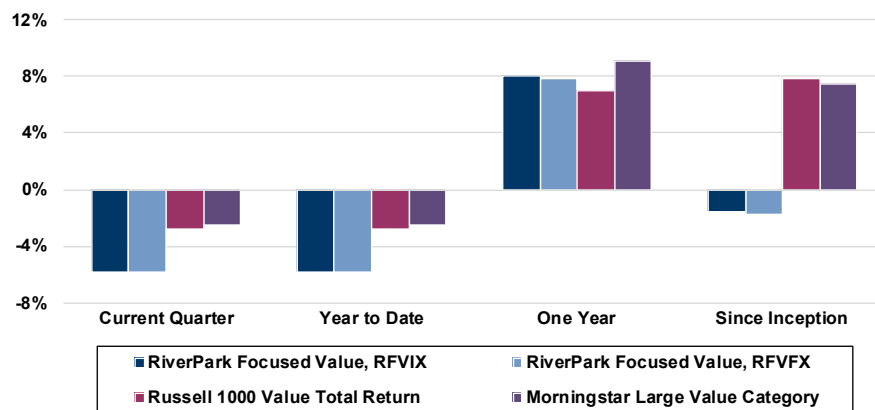

Investment Strategy

RiverPark Value seeks long-term capital appreciation by investing in large capitalization US equity securities that the Adviser believes are trading at substantial discounts to intrinsic value. The Fund intends to be concentrated, with generally 20-25 investments.

The Fund's investments typically fall into two categories: high-quality businesses at reasonable prices or businesses impacted by temporary challenges. The Fund seeks to invest in businesses that are durable, predictable, and run by shareholder-oriented management teams.

The Fund's investment approach is research-intensive value investing with a strong sell discipline. The Adviser will generally have a specific price target in mind when entering a position, will monitor each position as the stock price and value evolve, and will re-size or exit positions accordingly.

Performance: Net Returns through March 31, 2018

	Current Quarter	Year to Date	One Year	Since Inception ¹

* Expense ratios are as of the most recent prospectus, dated January 25, 2018. The Adviser has agreed to waive fees and reimburse expenses until at least January 31, 2019 to the extent necessary to assure that expenses will not exceed certain pre-agreed limits. The Adviser has the ability, subject to annual approval by the Board of Trustees, to recapture all or a portion of such waivers. The Gross Expense Ratio reflects actual expenses and the Net Expense Ratio reflects the impact of such waivers or recaptures, if any.

¹ Total returns presented for periods less than one year are cumulative, returns for periods one year and greater are annualized.

² Source: Morningstar Principia. Morningstar Large Value Category measures the performance of large-cap stocks with relatively low prices given anticipated per-share earnings, book value, cash flow, sales and dividends. Morningstar Large Blend Category funds invest in a variety of large US stocks. Stocks in the top 70% of the capitalization of the US equity market are defined as large-cap. The blend style is assigned to funds where neither growth nor value characteristics predominate.

The performance quoted herein represents past performance. Past performance does not guarantee future results. High short-term performance of the Fund is unusual and investors should not expect such performance to be repeated. The investment return and principle value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost, and current performance may be higher or lower than the performance quoted. Mutual fund investing involves risk including possible loss of principal. In addition to the normal risks associated with investing, international investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from social, economic or political instability in other nations. The Fund may invest in securities of companies that are experiencing significant financial or business difficulties, including companies involved in bankruptcy or other reorganization and liquidation proceedings. Although such investments may result in significant returns to the Fund, they involve a substantial degree of risk. There can be no assurance that the Fund will achieve its stated objectives. The Fund is not diversified.

The Russell 1000 Value Total Return Index measures the performance of those Russell 1000 companies that have lower price-to book ratios and lower expected long-term mean earnings growth rates. Index returns are for illustrative purposes only and do not reflect any management fees, transaction costs, or expenses. Indexes are unmanaged and one cannot invest directly in an Index.
