Investment Objective

The RiverPark/Wedgewood Fund seeks long-term capital appreciation.

Investment Strategy

The RiverPark/Wedgewood Fund generally holds securities of between 19 and 21 companies, with market capitalizations in excess of \$5 billion, which it believes have above-average growth prospects. The Fund invests in businesses that it believes are market leaders with a long-term sustainable competitive advantage. It patiently waits for opportunities to purchase what it believes are great businesses at attractive prices. While the Fund invests in growth it believes that valuation is the key to generating attractive returns over the long-term. Unlike most growth investors, Wedgewood is not a momentum investor but rather a contrarian growth investor. Wedgewood is a firm that believes in investing as opposed to trading and generally experiences an annual portfolio turnover of 25 to 30%.

The performance quoted herein represents past performance. Past performance does not guarantee future results. High short-term performance of the Fund is unusual and investors should not expect such performance to be repeated. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost, and current performance may be higher or lower than the performance quoted. Mutual fund investing involves risk including possible loss of principal. In addition to the normal risks associated with investing, international investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from social, economic or political instability in other nations. Narrowly focused investments typically exhibit higher volatility. There can be no assurance that the Fund will achieve its stated objectives. The Fund is not diversified.

The Russell 1000 Growth Total Return Index measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. The S&P 500 Total Return Index is an unmanaged capitalization-weighted index generally representative of large companies in the U.S. stock market and based on price changes and reinvested dividends. Morningstar Large Growth portfolios invest primarily in big U.S. companies that are projected to grow faster than other large-cap stocks. Index returns are for illustrative purposes only and do not reflect any management fees, transaction costs, or expenses. Indexes are unmanaged and one cannot invest directly in an Index.
