

# RiverPark/Next Century Large Growth Fund (RPNRX/RPNLX)

## Third Quarter 2024 Performance Summary

In the third quarter, the RiverPark/Next Century Large Growth Fund (the “Fund”) returned 0.58%, compared to the total return of the Russell 1000® Growth Index (the “Index”), which was up 3.19%.

### Performance: Net Returns as of September 30, 2024

	Current Quarter	Year to Date	One Year	Five Year	Since Inception
<b>Institutional Class (RPNIX)</b>	0.58%	21.00%	N/A	N/A	21.00%
<b>Retail Class (RPNCX)</b>	0.50%	20.70%	N/A	N/A	20.70%
<b>Russell 1000® Growth Total Return Index</b>	3.19%	24.55%	N/A	N/A	24.55%
<b>Morningstar Large Growth Category</b>	3.69%	21.77%	N/A	N/A	21.77%

*Total returns presented for periods less than one year are cumulative. The inception date of the Fund was December 29, 2023. Performance quoted represents past performance and does not guarantee future results. High short-term performance is unusual, and investors should not expect such performance to be repeated. The investment return and principal value of an investment will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than their original cost and current performance may be higher or lower than the performance quoted. For performance data current to the most recent month end, please call 888.564.4517 or visit our website at [www.riverparkfunds.com](http://www.riverparkfunds.com).*

*Expense Ratio: Institutional: 1.30% gross and 1.00% net, Retail: 1.55% gross and 1.25% net as of the most recent prospectus, dated January 26, 2024.*

*The Adviser has agreed to waive fees and reimburse expenses until at least January 31, 2025 to the extent necessary to assure that expenses will not exceed certain pre-agreed limits. The Adviser has the ability, subject to annual approval by the Board of Trustees, to recapture all or a portion of such waivers. The Gross Expense Ratio reflects actual expenses, and the Net Expense Ratio reflects the impact of such waivers or recaptures, if any.*

*Index performance returns are for illustrative purposes only and do not reflect any management fees, transaction costs, or expenses. Indexes are unmanaged and one cannot invest directly in an Index.*

## Market Review

In the third quarter of 2024, equity markets were positive and small cap stocks outperformed large cap stocks. Small cap stocks were particularly strong in July as it became more apparent the Fed would start the much-anticipated rate-cutting cycle at the September Fed meeting. Overall economic data continues to be mostly solid, and inflation continues to decline and is now approaching the Fed's target level of 2%. Meanwhile, the monthly jobs' reports softened in the middle part of the year and the unemployment rate ticked up. The combination of these data points led the Fed to initiate a 50bp rate cut in September as well as set expectations for continued cuts going forward. Given the market strength in 3Q and YTD 2024 and the improving breadth across small caps and the equal weighted large cap indexes, it appears investors believe the Fed has engineered a soft landing or no landing and that the US economy will avoid recession.

Third quarter performance notwithstanding, large caps have significantly outperformed for the better part of the last decade. Through 3Q 2024, the Russell 1000 Growth Index has delivered a 10-year annualized return of 16.52% vs the Russell 2000 Growth and Microcap Growth Indexes at 8.94% and 5.42%, respectively. Since the inception of our small cap and large cap track records over 25 years ago, the Russell 1000 Growth Index has delivered an annualized return of 8.48% vs the Russell 2000 Growth of 7.06%, and that includes the massive outperformance of large caps during the last 10 years.

- There have been periods in the past when small caps outperform large caps for long periods of time. *See Exhibit 1.*
- The valuation of the small cap sector relative to large caps is in the 11th percentile historically (zero being the least expensive relatively and 100 being the most expensive). *See Exhibit 2.*
- Earnings growth is expected to improve for the remainder of 2024 and 2025. *See Exhibit 3.*
- Small caps have generally outperformed large caps following the first Fed rate cut and for a sustained period afterward. *See Exhibit 4.*

Much of this performance delta over the last decade relates to healthy business fundamentals of large cap companies, which we think can be sustained. But we also believe there is opportunity in the smaller cap strategies.

## Portfolio Review

Our investment philosophy emphasizes direct research and adhering to a strong sell discipline. We strive to own companies that we believe can grow revenue and profits at strong rates in any economic and market environment. We feel we have the opportunity, if we pick the right stocks, to perform better than the index in all market environments. However, we do not outperform in every quarter or every year, and in the third quarter, we underperformed. In these environments, we believe our team must remain committed to our philosophy and process. Our strategies have been tested over multiple decades and many different market and macro environments, and our team has been together through most of that time. Sticking with our discipline amidst periods of short-term underperformance has helped us outperform over the long-term.

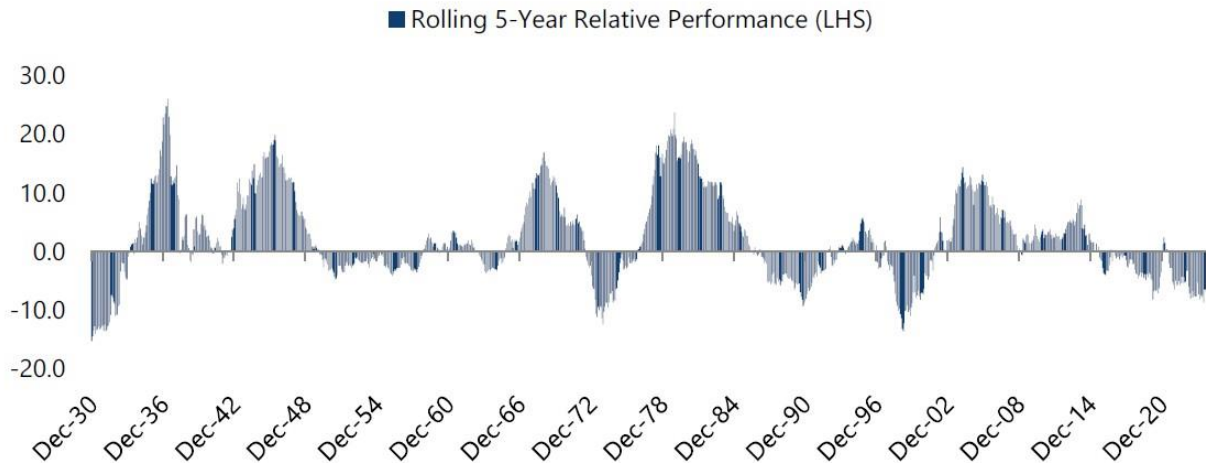

For the quarter, the Fund outperformed in financials, underperformed in industrials, health care, and consumer, and was inline in technology.

## Market Outlook

We believe the future direction of the market will depend on the path of the economy and the direction of earnings estimates. With the first Fed rate cut in the rearview mirror, the Fed continues to lean toward a more accommodative position but is expected to closely monitor the economic data to inform future decisions. After a strong September jobs report, the expectation around the magnitude of expected rate cuts was pared back for the November and December Fed meetings. The presidential election is also being closely watched by investors. Given that polls indicate a close race, we believe the market could experience some volatility leading up to and shortly after November 5th. However, in our experience, moving past election outcomes allows the market to refocus on the path of the economy and the direction of earnings estimates. As of now, investors are expecting strong earnings growth in 2025. See Exhibit 3.

Our experienced and stable team has worked through many of these environments over the past 25 years, and we believe we can lean on our experience of bottom-up stock picking to navigate this market as well. As always, we will stay focused on our core investment philosophy. We believe a portfolio of high-quality growth companies, selected using our original research, and combined with a strong sell discipline will lead to compounding of portfolio value and market outperformance over time. We believe our since inception investment results continue to support this approach.

<sup>+</sup>Past performance is not an indicator of future performance. The Russell 2000 Index is a small-cap U.S. stock market index that makes up the smallest 2,000 stocks in the Russell Index. The Russell 1000 Index is a U.S. stock market index that tracks the highest-ranking 1,000 stocks in the Russell 3000 Index, which represent about 93% of the total market capitalization of that index. The Russell Midcap Index measures performance of the 800 smallest companies in the Russell 1000 Index.

### 3Q Portfolio Activity

- In the technology sector, the Fund is underweight, but we maintain significant exposure to the sector as growth fundamentals remain strong in many of the large positions in the index as well as in many other areas.
- In consumer, the Fund is underweight and continue to focus on companies we believe have long-term secular growth opportunities.
- In health care, the Fund is overweight as we believe fundamentals remain strong across large pharma, medical devices and health care services.
- The Fund is overweight in industrials driven by companies that we believe have secular growth drivers. This sector underperformed in Q3 primarily due to two holdings: Symotic Inc., which traded down after its earnings report and a subsequent short report, and The Boeing Co.. Boeing has faced multiple issues in 2024, but we still believe in the long-term growth potential of the business.
- The Fund is overweight the financial sector, with our positions in The Progressive Corp., Kinsale Capital Group, Inc., and The Goldman Sachs Group, Inc.
- The Fund sold two positions to zero in Q3: Celsius Holdings, Inc., due to fundamental concerns, and Novo Nordisk A/S, which was a successful investment in pharma where we decided to redeploy those assets into companies that we believe have better risk return profiles.
- The Fund added one new position in Q3: Howmet Aerospace Inc., a leading supplier into the aerospace supply chain.

## Sector Weights

The below chart shows the Industry Classification Benchmark (ICB) sector weightings of the Fund and the Index as of the end of the quarter.

Sectors	RiverPark/Next Century Large Growth Fund	Russell 1000® Growth Index
Technology	53%	60%

Old Dominion Freight Line, Inc.	3.1%
Costco Wholesale Corp.	2.9%
	<b>54.8%</b>

*Holdings are subject to change. Current and future holdings are subject to risk.*

## Conclusion

Thank you for your interest in the Fund. The large cap sector continues to lead the market and the Fed's accommodative stance, including the recent Fed rate cut, should allow for continued growth. As always, we will stay focused on our core investment philosophy. We believe a portfolio of high-quality growth companies, combined with a strong sell discipline, will lead to compounding of portfolio value and market outperformance over time. We believe our investment results continue to support this approach.

Sincerely,

The Next Century Large Growth Team

**To determine if the Fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk factors, charges and expenses before investing.
